

## CUT FOAM PRICE INCREASE

November 19<sup>th</sup> 2020

Dear all

Unfortunately the situation with cut foam remains unstable in the market. We continue to receive price increases from our sub suppliers. The shortage of chemicals affects not only our usual sub suppliers but the whole market.

We can't take on the extra cost alone so price increases are inevitably. We will like to assure you that we do not take extra profit from the situation, and price increases are only to cover the extra costs for the cut foam.

The price of cut foam components will be increased separately, and we will reduce it separately again when prices hopefully go down.

Information will be sent directly to those of our customers under the influence of this.

We kindly thank you for your understanding and cooperation.

Best Regards

The Management
